

LD TOTAL
OYSTER HARBOUR
 Lower King Road
 Albany, Western Australia

DESIGNED BY - EMERGE

LD Total completed construction of hard and soft landscaping to Oyster Harbour stage 1 Albany in early 2008.

On a windy hilltop under a patch of Red Gums overlooking the stunning views to Oyster Harbour and beyond, LD Total constructed terraced laterite retaining walls to create zones for playing with the kids or gazing for distant ships.

Utilising the existing canopy of the trees LD Total used bird attracting native shrubs for mass plantings throughout the POS and continued the theme for the verges along the front entry statement. Some large Norfolk Pines were transplanted to define the estate, along with some ancient grasstrees to the sales office precinct.

Due to the high level of build quality and natural topography, Oyster Harbour Estate has become well renowned in the Great Southern District and hence stage 2 is under construction.
