## ABBEY WATERS

Bussel Hwy  
Busselton, Western Australia

Abbey Waters was Landscape Developments inaugural Design and Construct project in the South West region. The project entailed numerous public open space areas, as well as an extensive landscaped buffer zone between the Highway and the residential estate.

Works included both hard and soft landscaping, including plant selection, paving and playground equipment.

Due to the low yield of the bores, water was directed into a large water tank from which the landscape could be irrigated.
